# Node Package Manager

NPM

Makes it *easier* to *install* and *update* the different *libraries, frameworks, etc,* that we'll include in our projects.

timely—unupdated—remote

```html
<link href="https:bootstrapfont.css">
<script src="http:google.jquery"></script>
<script src="bootstrap.min.js"></script>
<link href="https:bootstrapfont.css">
<script src="http:google.jquery"></script>
<script src="bootstrap.min.js"></script>
```

NPM

- ***Quicker*** to find

- Will ***include*** libraries, frameworks, and other tech ***locally***

- Usually kept ***updated***
